

Tender Creatures: Casting and Molding Our Bodies

Come learn to mold and cast a part of your own body. We will use alginate, a quick curing material to make a mold for a plaster statue. What parts of your body do you pay the most attention to and why, what is held in the part you choose to mold? Come engage as you can- you're welcome to sit and talk, help a friend, or mold your own body. This activity is suitable for people of all ages & art experiences.
