To Connect a Mac

1. Press the “On” button on the wall controller.
2. Press the “laptop” button on the wall controller.
3. Plug your laptop into the HDMI cable (there should be a MAC adapter attached).
4. Use the wall controller to adjust the volume.

To get the sound to come out through the TV, you may need to adjust your laptop settings.

Open System Preferences and Click Sound
Click the Output tab and select HDMI.
- FYI: while HDMI is connected and selected, the volume controls on your laptop will not work—just use the TV volume.

If the top of your Mac screen is getting cut off on the TV image:

Open System Preferences and click Displays
Adjust the "Underscan" slider on the LG TV window.
If the image looks squished or weird:

Check your resolution settings.
- Open System Preferences and go to Displays. On the LG TV window, try 720p or 1080p.

If you are getting an extended desktop instead of the TV mirroring what's on your Mac screen:
- Go to the Arrangement tab and check "Mirror Displays"
